On Dual xeon 3 / 4gig ram server I installed kernel

Linux version 2.6.9-023stab040.1-smp (root@rhel4-32) (gcc version 3.4.5 20051201 (Red Hat 3.4.5-2)) #1 SMP Tue Jan 16 00:54:22 MSK 2007

But its not showing the exact RAM on server. Can anyone tell me which kernel to be use for Dual processor and RAM over 4Gigs on server.
Thanks.

If you are using the stock kernel try smp (x86_64) for 64bits or enterprise (i386) for 32 bits
