I am using custom add_ip scripts for my debian VE's. Upgrading from vzctl 3.12 to 3.14 invented a problem, that the add_ip is no longer called.
The node also runs debian sarge.

thx

fabian

looks like the exterrnal script thing helps out here

no sorry this is not possible.
but i just set up another node with plain debian and a simple debian ve.
As far as i can see the same problem.

Perhaps i should mention that i am using NETIF feature !

Ok, then, please, check your
/etc/vz/dists/debian-*.conf files and OSTEMPLATE field of <veid>.conf file of VE in question.

Thanks.
