Subject: *SOLVED* control-C ignored in VE ??

I did a search, but didn't see this problem covered...

From within a VE (vzctl enter 100) if I try to interrupt a command with Control-C, the Control-C is ignored. I noticed this initially when I tried to ping an IP address from within a Fedora Core 5 VE.

I get the same behavior even if I ssh into the VE.

Is this a know problem?

I'm using kernel 2.6.20-ovz002.1 and the latest utilities..

Thanks for any help,

Bill

Interesting... I just installed the latest kernel 2.6.20-ovz005.1 and the problem is fixed.

Yes, there were problems with signals in early 2.6.20-ovz series.

Thanks,
Vasily.
