Hello,
problem with vps,
will time user login to vps,show very error to user

Start: 0.06
Show Select: 0
Fsockopen: 0.01
Got this much:243 Remote Exec localhost: type: vps__openvz::getStatus, class: get_action name: action: ; subaction get : 0.07
Notice : Undefined property: hackbuttonconfig_b::$nobackup in /usr/local/lxlabs/hypervm/httpdocs/htmllib/phplib/lib/lxclas s.php at 2570
Notice : Undefined property: hackbuttonconfig_b::$nomonitor in /usr/local/lxlabs/hypervm/httpdocs/htmllib/phplib/lib/lxclas s.php at 2570
Notice : Undefined property: reversedns_b::$enableflag in /usr/local/lxlabs/hypervm/httpdocs/htmllib/phplib/lib/lxclas s.php at 2570

and
Fsockopen: 0
Got this much:2227 Remote Exec localhost: type: vps__openvz::vpsInfo, class: get_action name: action: ; subaction get : 0.12

loop16: 0.02

and

Master: clean: part5.vm vps
No subaction for update not syncing anymore ssession
Writing ssession IJbm3rWbnhJY7dvKUuqzfGdrNJ5qax3Jh5VANSBaZvY6ztrtE7I...dbacti on... update
Success: updated ssession for IJbm3rWbnhJY7dvKUuqzfGdrNJ5qax3Jh5VANSBaZvY6ztrtE7I
Readonly resource in vps part5.vm
Page Generation Took: : 0.48
Master: update: IJbm3rWbnhJY7dvKUuqzfGdrNJ5qax3Jh5VANSBaZvY6ztrtE7I ssession
No subaction for update not syncing anymore ssession
Writing ssession IJbm3rWbnhJY7dvKUuqzfGdrNJ5qax3Jh5VANSBaZvY6ztrtE7I...dbacti on... update
Success: updated ssession for IJbm3rWbnhJY7dvKUuqzfGdrNJ5qax3Jh5VANSBaZvY6ztrtE7I

and

Fsockopen: 0.01
Got this much:2227 Remote Exec localhost: type: vps__openvz::vpsInfo, class: get_action name: action: ; subaction get : 0.06

and bw go to failed and 137438953481.69 GB

please help me

this is an error message when using the lxlabs interface or otherwise lxlabs-only software, correct?

send us this information:
-what kernel are you using?
-how could someone else duplicate the problem you are reporting?
