hi,

i just learned about a new webinterface for openvz.
it looks very promising, but seems to be in an very early state.

its located at sourceforge: http://mwamko.sf.net/

maybe here are some devs who could help with this project

best,

Dave

p.s. i am not involved in this project - i am just looking for a good webadmin

Dear Dave,

It was a pleasure to find such a post on the OpenVZ Forum, but we are indeed in an early state.

I will make an announcement and write a letter to the OpenVZ team once our web technology becomes good enough.

Developers are welcome to contribute:
* Programming is in Ruby
* I am in the process of switch our version control to Git

Your interest is greatly appreciated.

Sincerely,
Alex Levchuk
