Subject: *SOLVED* Which Kernel 2.6.18 or 2.6.20?

I see there's a new 2.6.18 kernel out. Just wondering which kernel I should use? Should I stick with 2.6.18 or the experimental 2.6.20?

Currently we support four branches -- 2.6.9, 2.6.18-vanilla, 2.6.18-rhel5, and 2.6.20. The first three ones are really stable, while 2.6.20 is still a bit shaky in the moment.

Unless you want to live on the bleeding edge, stay with 2.6.18 (or even 2.6.9)

Thanks - I'll go with 2.6.18
