Hi @ all,
I have to backup all my Data today because of HDD errors.
I tried to backup every partition by using tar.
I get the following errors:
...
tar: ./lib/vz/private/101/var/spool/postfix/private/virtual: socket ignored
tar: ./lib/vz/private/101/var/run/cgisock: socket ignored
tar: ./lib/vz/private/101/dev/log: socket ignored
...
Will my VE work after extractig the archiv?
