Hi!
null wrote on Fri, 07 September 2007 20:50now my vps swap is 0 !!\
Why do you think so?
Take a look at the link, might be it will help you?

This is a display only restriction, in fact VE will use as much virtual memory as it is allowed by its UBC parameters, in particular privvmpages. If it will be necessary, VE will use swap, despite on the 'free' output.
