iptables don;t work inside Vps always keep lines errors

have issue to secure the vps firewall after i setup the vps client i login to vps and i use lokkit but after i check iptables id not filter the vps

what firewall will easy to use for the vps not for Host ?

Thank Lot All my Openvz Friends!!!!!!

have you enabled iptables for VPS?

```
# vzctl set VPSID --iptables <modules> --save
```

```
# vzctl restart VPSID
```

```
# man vzctl
```
