have issue today i been upgrade the kernel
aand i create new VPS

i setup new Cpanel

sh latest ?>>>>

and i see

fork failed: Cannot allocate memory

what is about this Issue

Please Help Me ASAP
Best regards

i think i fix
vzctl set 102 --numothersock 3000 --save
the setting will ok or to much ?

--numothersock 3000 ?

------- More Issues ----------

fork: Cannot allocate memory
