Some VPS do not start when we restart the node. How can we fix that.

Tnx.

We need a little more information such as what distro are you running on the HN and guests?  
Any logs that might show errors. Do the VPS run if you start them manually? Do they fail during  
the initialization of the VPS? (what does vzlist show?)

Etc.

Jim.

HN centos 4.5 32bit  
Guest running mostly centos and debian.  
VPS start manually.  
When I reboot the node. Some VPS are rebooted. When I run vzlist -a  
some are stopped. If I start them manually they come up.  
How can I set that all VPS are rebooted on HN reboot.

Thanks

i have same problem in kernel " 2.6.9-023stab043.2-enterprise "

os " centos 4.5 "

when i make reboot inside vps not boot again should start it manual  
from master server

vzctl start vid

Could you please check "ONBOOT" parameter in \$VEID.conf?

ONBOOT="no" means not to start this VE automatically.

yes i'm checked

really i found it

ONBOOT="yes"  
CLASSID="2"

steel problem

ok.

VE restart is done by cron job which checks each 5 mins if any VE should be started.

/etc/cron.d/vz:

```
# Start VEs marked as rebooted.  
*/5 * * * * root /usr/share/vzctl/scripts/vpsreboot
```

Might be you just didn't wait for 5 mins?

Yes, there were few VPS with onboot no I changed them to yes.

Thanks.
