Subject: Bug reports should go to bugs.openvz.org

If you think you found a bug in OpenVZ, the best place to report it is bugs.openvz.org. Forum does not have any means to track bug status, so it is easier to ignore/forget the bug. Bugs reported to bugzilla will never be forgot, discarded or otherwise ignored - so it is in your interest to use Bugzilla.

If you are not sure if this is a bug report or just your misconfiguration - file a bug report first, then ask for support here citing all the details and giving the link to bugzilla bug.
