Subject: PATCH for small cron prob. in /etc/init.d/vz

The init script in vzctl-3.0.18 installs the file:
  /etc/cron.d/vz
as part of its startup, what is strange as that on CentOS5 at least the
last mod of the folder /etc/cron.d is NOT updated!

What this means its that CRON does not know about the new file as as
such does not run it.

Hope this info helps,

Here is a quick patch to fix the prob:

```
--- /etc/init.d/vz_orig     2007-07-31 16:54:05.000000000 -0400
+++ /etc/init.d/vz  2007-11-17 01:56:30.000000000 -0500
@@ -131,6 +131,7 @@
        [ -d "$SRC_CRONSCRIPT_DIR" ] || return
        cat $SRC_CRONSCRIPT_DIR/vz* > $DST_CRONSCRIPT_DIR/vz && \
                chmod 644 $DST_CRONSCRIPT_DIR/vz
+       touch -m $DST_CRONSCRIPT_DIR
 }

 remove_cron()
```

I see that as a workaround. We'd better find a reason why it happens
that way.

Can you demonstrate that mtime of /etc/cron.d is not changed?
