I have a 530 Login incorrect error when I try to log into my VPS.
I checked the /var/log/secure file.
Which says: error: Bind to port 22 on 0.0.0.0 failed: Address already in use.

Ok so I have no real idea what I should be doing this is my first time with openvz, any help/suggestions will be much appreaciated.

Can you give us more details? did you try entering the VE via the host (hardware node) (vzctl enter $VEID)?

Did you read the manual?

Ugo

yes no problems there.

Just cant login via FTP.

If there is anyone who would be interested in fixing the problem for me I would be happy to pay them via paypal.

Just PM me a quote!
