Ok, I made a user now exactly how I want to make another one.
Can I just copy the Private Folder and make a config file or will my system die if Id do that?

I just have one box. And I need a (nearly) exact Copy of it (I need another IP. And thats all)

well, what is the Quickest way to do this?

Thanks.
Cheers,
Robin

Hi,

Do you want to clone your VE? Is it right?
If yes, please see at this wiki page:
http://wiki.openvz.org/Cloning_VE

Thank You!

I do that using vzdump. Works perfectly.

I do a backup, restore with another VEID, change the hostname, IP in config, then start.
