If I create a new VE with

/usr/sbin/vzctl create 777 --ostemplate myostemplate --config
myconfig.256MB

the corresponding config file still has: ORIGIN_SAMPLE="vps.basic"

should be: ORIGIN_SAMPLE="myconfig.256MB"

- Dietmar

I just found a bug in my code - vzctl works perfectly :-)

sorry for the wrong bug report.

- Diwetmar
