What are you trying to do? encrypt your $VEID.conf and make it work?

Why would you need to do that?

Please try to give a significant subject when you create a topic and give more information when you ask a question...

An example of title could have been "Encrypting $VEID.conf".

When people are subscribed to the forum, like me, they receive an e-mail saying that a new topic has been created. They look at the subject, and if they think they can help, they go on the web, log in, and then help. But with "Question" as a topic, we often do all these steps to figure out that we lack knowledge (or, in your case, we don't understand the question).

Regards,
Ugo

Ok, sorry I shouldn't have tried to help, I guess.

Have a nice evening.

Ugo
