Patrick,
as you know ipt_ULOG has incompatibility in netlink interface. I've found Your
comment here:
http://www.mail-archive.com/sparclinux@vger.kernel.org/msg00783.html

However I would ask You about the following your phrase: "We have some compat
code in userspace". Could You please explain it in more details?

thank you,
Vasily Averin

I applied a patch from Eric Leblond some time ago that fixes this
up in ulogd.

SVN revision r6688.
