Hi,
I'm getting this after upgrade to 3.0.22

srvr:/# vzctl stop testlink
Stopping VE ...
VE was stopped
/usr/lib/vzctl/scripts/vps-functions: line 146: [: del: integer expression expected

ii vzctl 3.0.22-2 server virtualization solution - control tools
srvr:/# vzctl start testlink
Starting VE ...
VE is mounted
Adding IP address(es): 192.168.99.82
/usr/lib/vzctl/scripts/vps-functions: line 146: [: add: integer expression expected

and this:
["$1" -eq "add"]
(test seems to use = for strings and -eq for integers, which is strange,since
I do recall using -eq specifically for strings)

--
Key fingerprint = 40D0 9FFB 9939 7320 8294 05E0 BCC7 02C4 75CC 50D9
Total Existance Failure

vzctl source code does not contain such expressions,
$ fgrep -re '-eq "' . |wc -l
0
Looks like you are testing some patched vzctl build.

Hi Darius,

it's a debian package problem vzctl-3.0.22-2, see:

Debian bug report ->
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=459717 and
OpenVZ bug report -> http://bugzilla.openvz.org/show_bug.cgi?id=780

Please report this bug to debian bts!

Regards,
 Thorsten
