Subject: *SOLVED* Starting old VEs on 2.6.24

Hi,

i rebuild my 2.6.24 kernel from the git master but when starting any VE i get

"kobject_add failed for 0 with -EEXISTS"

If i boot back to my 2.6.22-ovz005-kernel everything works as expected ...

Any ideas around here how to solve this?

Thx!

[*SOLVED*: -> already explained in Bugzilla, Group-Scheduler issue]
