Here is a minimal debian 4.0 template that includes midnight commander and a DNS server.

After it's unpacked, set your domain search list in /etc/resolv.conf, run tzconfig, aptitude update, and away you go ...

Whee!

ftp://isp2dial.com/openvz/debian-4.0.tar.gz

Download speed record belongs to FIU at 2.8 mB/sec. Can you top that?

Get it while it's hot. It's better than a piratebay torrent!
