Hi,
i'm new in thi forum.
i apreciate if you can help me.

i have actually 2 servers with diferents OS. there are a custom flavor of linux. in both of them.

i use an ISO file to clonate the servers, so all the proceses are already there and we anly change the IP's. for create new servers to use.

I'd like to know if i can mount both of them into one OPENVZ server.

any help is very apreciate.

thanks in advance.
