Hi All

Is there a link to some documentation which would tell me the version of
the gfs2 patch used by the openvz kernel for rhel5?

Is it using a newer gfs2 than rhel5.1 is?

OpenVZ kernel is based on RHEL5.1, so you will find the same version of gfs2 as in RHEL5.1.
However, we found gfs2 to be unstable and don't recommend it for use.
