I'm getting the following errors when starting heartbeat in OpenVZ:

Jun 23 18:13:07 vps5049 heartbeat: [5900]: info: G_main_add_TriggerHandler: Added signal manual handler
Jun 23 18:13:07 vps5049 heartbeat: [5900]: info: G_main_add_TriggerHandler: Added signal manual handler
Jun 23 18:13:07 vps5049 heartbeat: [5900]: info: G_main_add_SignalHandler: Added signal handler for signal 17
Jun 23 18:13:07 vps5049 heartbeat: [5900]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:07 vps5049 heartbeat: [5900]: info: Local status now set to: 'up'
Jun 23 18:13:08 vps5049 heartbeat: [5902]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:08 vps5049 heartbeat: [5904]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:08 vps5049 heartbeat: [5905]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:08 vps5049 heartbeat: [5908]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:08 vps5049 heartbeat: [5907]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:08 vps5049 heartbeat: [5906]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:08 vps5049 heartbeat: [5903]: ERROR: Unable to set scheduler parameters.: Operation not permitted
Jun 23 18:13:09 vps5049 heartbeat: [5900]: info: Link 74.201.36.1:74.201.36.1 up.

Any ideas??

sean

In such cases the best thing to do is to strace a program and see which syscall is failing.
