Subject: vz startup message - is this a problem.

When I start vz I get the message:

Configuring interface venet0: net.ipv4.conf.venet0.send_redirects = 0

Is this ok? I don't seem to recall getting that message on other servers where I've installed openvz.

Here's the full transcript:

```
/sbin/service vz start
Starting OpenVZ:                                           [  OK  ]
Bringing up interface venet0:                              [  OK  ]
Configuring interface venet0: net.ipv4.conf.venet0.send_redirects = 0
                                                           [  OK  ]
```

There is nothing to worry about.
I suppose, whether the text "net.ipv4.conf.venet0.send_redirects = 0" is present in output or not depends on sysctl version...
However, maybe is it better to make redirection to /dev/null in vz script to avoid this message?
We'll think about it. Thank you!
