Subject: revive vzprocps? (vzpid and top)

Hi,
wondering if anyone has a newer version of vzprocps around?
I would love to know at a glance what VEs are using what CPU the most etc.
Or just have a VE column in top (or htop even) that did vzpid on each process...
Is there any plans to revive vzprocps and perhaps even include as part of the tools with vzctl etc?

thanks

dave

do you have in mind that vzprocps was in OpenVZ?

no, it was in contrib.

However, I have since solved my problem - htop has support for openvz if you rebuild it with --enable-openvz.
Then the VEID is alongside the process. Works great.
I have built packages for ubuntu dapper and hardy amd64 if anyone would like them, PM me.

thanks

dave
