i have problem when install Openvz

when do the command get it
/sbin/service vz start

Running kernel is not OpenVZ kernel. [FAILED]

what i do to fixed the problem

Install a OpenVZ enabled linux kernel (-> http://wiki.openvz.org/Quick_installation );
if you have installed a OpenVZ kernel, plz check your bootloader boot this OpenVZ kernel.

try to compile openvz kernel
( http://download.openvz.org/kernel )
and check
( http://wiki.openvz.org/Quick_installation )
