I installed a EV debian.etch.minimal.i386 in a container ubuntu hardy amd64. Its all ok, but when I install ruby, it crashed because need a library called time.h in /usr/include/sys, but in this location only are there: X11(d)  ccze.h  initreq.h

Where is time.h?

Thanks and sorry for my poor english.

Hi,

on my Fedora 7 mashine:

# rpm -qf /usr/include/sys/time.h
glibc-headers-2.6-4

Ok, resolv. It's in libc6 libc6-dev.
Thanks.
