Hi everybody,

How many containers do you run per CPU core? We are doing a little research and this data will be really helpful.

Cheers,

T.

Containers per CPU core(total votes: 0)

1-2 0/(0%)
3-5 0/(0%)
6-10 0/(0%)
11-15 0/(0%)
16-20 0/(0%)
21-30 0/(0%)
31-50 0/(0%)
more than 50 0/(0%)

I have to vote 1. In all my openvz HN I generally have less than 5 containers running and this is on 2 to 4 core machines. The basic reason is I do not need more tasks to be run at the moment.
