Hey there,

I just did another physical-to-VE procedure. Done it before with no problems, but this one gives me a headache.

Some relevant lines:

[root@hw28101 private]# cat /etc/vz/conf/28999.conf
# Configuration file generated by vzsplit for 1 VEs
# on HN with total amount of physical mem 4011 Mb
# low memory 4011 Mb, swap size 8095 Mb, Max treads 8000
# Resourse commit level 0:
# Free resource distribution. Any parameters may be increased

          UP BROADCAST POINTOPOINT RUNNING NOARP  MTU:1500  Metric:1

/etc/resolv.conf:
cleanmail:/# cat /etc/resolv.conf
search jkit.nl
nameserver 208.67.222.222

iptables on host <snipped>:
Chain INPUT (policy ACCEPT)
target     prot opt source               destination

Chain FORWARD (policy ACCEPT)
target     prot opt source               destination
<snip>
           all  --  85.113.250.230       anywhere
           all  --  anywhere            85.113.250.230

Chain OUTPUT (policy ACCEPT)
target     prot opt source               destination
```

Now.. maybe I'm not seeing it, but this looks all fine to me. Yet.. no traffic possible, not in, not out. Any hints?

Hello,

Do you have others VEs which are running and with a working networking on your HN ?
Maybe the problem come from the HN ?
Do you have a good /etc/sysctlf.conf ?

http://wiki.openvz.org/Quick_installation#sysctl

Yes, I do have other working VE's on the HN. Also: I vzmigrated the VE to another HN.. same problem. The second HN also has other (properly working) VE's.

Hello,

I've the same problem.
Did you find a solution ?
Could you please tell me what solved this issue ?

Thanks,

Delphine
