Subject: open-iscsi inside VE

Hi everyone,
my question is simple, ¿is possible to run open-iscsi inside of a VE? open-iscsi use various kernel modules but openvz restricts the uses of these kernel modules into VE, and for this isn't possible to make run iscsid . ¿what you recommend? ¿Is possible to integrate the open-iscsi modules inside the Linux kernel? or.. ¿exists other better solutions?

thanks very much!!
marc.

sorry for my horrendous english
