Hi Guys

Like to thank all the great work on this opensource software

I have dell 2950 with Dual XEON 5405 CPU and Centos 5.2 64 bit version installed.

I don't which ovzkernel to install ?

I was looking at ovzkernel-ent but it is in i686 but not in X86_64

What is the right one to install ?

Thanks

Ben

Hello,

http://download.openvz.org/kernel/ shows us what kernels are stable and maintained and which of them are development branches.

I'd recommend you rhel-5 based kernels

http://download.openvz.org/kernel/branches/rhel5-2.6.18/curr ent/
in particular
http://download.openvz.org/kernel/branches/rhel5-2.6.18/curr
ent/ovzkernel-2.6.18-92.1.18.el5.028stab060.2.x86_64.rpm
