Hi.

Does anyone have a patch or a kernel source for a 64bit kernel with the latest ovz009.1 source applied. I want to use this patch together with drbd 8.3.1 if possible.

I have found a 2.6.24 source with ovz006.5 but nothing newer. This i patched fine with the drbd 8.3.1 but it is missing many of the newer fixes.

Thanks

Mark

Hi,

is this what you want?
http://download.openvz.org/kernel/branches/2.6.24/2.6.24-ovz 009.1/

It was, and a bit hard to find in all the links, I did manage later on last night and now have successfully built ovz009 with 2.6.24 and drbd 3.0.1 and packaged it all into a working debian package.

Thanks

Mark
