Is dumping broken in Debian 5 lenny?

```
# vzctl chkpnt 102 --dump --dumpfile dump.102
Setting up checkpoint...
        join context..
        dump...
Can not dump VE: Invalid argument
Checkpointing failed
```

Debian 5 (Lenny)
Stable Kernel 2.6.26-2-openvz-686 #1 SMP Fri Aug 14 02:44:04 UTC 2009 i686 GNU/Linux
(linux-image-2.6-openvz-686_2.6.26+17+lenny1_i386.deb)
vzctl version 3.0.22
additional module: drbd8-modules-2.6-openvz-686

"vzctl chkpnt 102 --suspend" works fine, but the following "vzctl chkpnt 102 --dump --dumpfile .." exited with error (see above)

strace says:

```

Any ideas how to use OpenVZ on Debian 5 ????

Or do i have to go back to older versions?
