Subject: iptables shows 0 bytes at INPUT and OUTPUT

Hi,

I am folliwing the tutorial from http://wiki.openvz.org/Traffic_accounting_with_iptables.

But I get stuck on getting the INPUT and OUTPUT traffic. If I execute 'iptables -nvx -L FORWARD' it shows me how much it has used, but this is just internal I think?

When I execute for example 'iptables -nv -L INPUT' the output is zero:
Chain INPUT (policy ACCEPT 432M packets, 59G bytes)
 pkts bytes target   prot opt in   out   source   destination
    0   0   all -- venet0 *   0.0.0.0/0   xxx.xxx.xxx.xxx

We are using the kernel '2.6.26-2-openvz-amd64' on Debian Lenny.

Hopefully you can help me out.

Thank you in advance!
