Hi
Please, a explanation..
When I run the command TOP in hardware node I see..

Cpu(s): 34.8%us, 43.4%sy, 21.3%ni, 0.0%id, 0.0%wa, 0.0%hi, 0.5%si, 0.0%st

Why is 0,0% idle e CPU not 100% ?

Thanks

34.8%us + 43.4%sy + 21.3%ni + 0.5%si equals exactly 100

so your host is pretty busy and not running idle at all.
