Subject: Human readable status of 2.6.32 or source for this status?

Hi,

I'm waiting for 2.6.32 openvz kernel since a year and I try to read status of the development.

Unfortunately, I haven't found a reliable source of information (RSS? roadmap?) and I kindly ask about its status. Or better - give me link to sources of information.

I'm only advanced user (sysadmin) so I would appreciate human readable info if possible If not, I accept anything.

Thanks.
