Subject: openvz wont start, stays mounted

Hi,

I copy'd a vz and tried to boot it up. However, it won't start.

vz status is 'mounted'.

I increased the verbosity level of vz, but I need to restart vz in order for this to take effect, which I cannot do.

Any suggestions?

some non-verbose log output:

avon:~# tail -f /var/log/vzctl.log
2010-10-26T10:33:41+0200 vzctl : CT 114 : Running container script:
/etc/vz/dists/scripts/debian-add_ip.sh

Hi,

start your ct with --verbose mode:

% vzctl --verbose start <CTID>

and post the output here.

Bye,
Thorsten
