As per http://wiki.openvz.org/Centos_Upgrade_4.x_to_5.0 (step 10)

I'm upgrading from CentOS4 to CentOS5 and am trying to update the packages using yum, however I am faced with this error:

[root@lime ~]# vzyum 112 upgrade > yumupgrade112.txt
Error: initscripts conflicts with kernel < 2.6.12

Looks like the hardware node needs a newer kernel...

[root@lime ~]# rpm -q kernel
kernel-2.6.9-34.EL
kernel-2.6.9-42.0.10.EL
kernel-2.6.9-55.0.2.EL
kernel-2.6.9-67.0.7.EL
kernel-2.6.9-78.0.1.EL
kernel-2.6.9-78.0.13.EL
kernel-2.6.9-89.33.1.EL
[root@lime ~]# yum update
Setting up Update Process
Setting up repositories
Reading repository metadata in from local files
No Packages marked for Update/Obsoletion

Now what...?

Any advice?

Thanks.
