Hello

I am having major issues with network speed that i can not figure out

When i log into the node with the openvz kernel the download rate is terrible, the server has a 100mb uplink port

[root@apolo ~]# uname -a
Linux apolo.tisolutions.com 2.6.18-194.26.1.el5.028stab079.2 #1 SMP Fri Dec 17 19:25:15 MSK 2010 x86_64 x86_64 x86_64 GNU/Linux

[root@apolo ~]# wget htt p://speedtest.dal01.softlayer.com/downloads/test100.zip

[root@apolo ~]#

Now when i log into the default centos kernel network speed is fine

[root@apolo ~]# uname -a

I had the NOC change out the NIC card to see if that would make any difference but it is still doing the same thing.
