Hi i changed to openvz on about 6 of my server and one of them that is runnig centos 5.5 i carnt change to bootloader to boot in openvz kernal. Can some one help me with the ssh command and how to do it.

bit of my system info here.

```
  You have a /boot partition.  This means that
#         all kernel and initrd paths are relative to /boot/, eg.
#         root (hd0,0)
#         kernel /vmlinuz-version ro root=/dev/VolGroup01/LogVol00
#         initrd /initrd-version.img
#boot=/dev/mapper/pdc_bfiahedhf
default=1
timeout=5
splashimage=(hd0,0)/grub/splash.xpm.gz
hiddenmenu
title CentOS (2.6.18-238.5.1.el5.028stab085.3)
        root (hd0,0)
        kernel /vmlinuz-2.6.18-238.5.1.el5.028stab085.3 ro root=/dev/VolGroup01/LogVol00 rhgb
quiet
        initrd /initrd-2.6.18-238.5.1.el5.028stab085.3.img
title CentOS (2.6.18-194.32.1.el5xen)
        root (hd0,0)
        kernel /xen.gz-2.6.18-194.32.1.el5
        module /vmlinuz-2.6.18-194.32.1.el5xen ro root=/dev/VolGroup01/LogVol00 rhgb quiet
        module /initrd-2.6.18-194.32.1.el5xen.img
title CentOS (2.6.18-194.el5xen)
        root (hd0,0)
        kernel /xen.gz-2.6.18-194.el5
        module /vmlinuz-2.6.18-194.el5xen ro root=/dev/VolGroup01/LogVol00 rhgb quiet
        module /initrd-2.6.18-194.el5xen.img
```

dont no if i completely cocked it up im new to all this.

thanks.

Change default=1 to default=0 in grub.conf and reboot.

Kernels are counted starting with 0 so if your openvz kernel is the first listed, it should be 0.

iv tryed and i still get the error, (not openvz kernal when i try to start openvz)

I'v even use kvm over ip to do boot into it and still wont have it

can you tell me how my grub file should be edited please.

thank you ales
