I use stab089.1 and never (seems) have this problem.
Now I perform upgrade to stab091.1 and have this problem with all boxes I perform this upgrade on.

edquota -u test
No filesystems with quota detected.

Both HW and node have quotas enabled.

Applying solution from google/openz didn't help.
Seems kernel bug?

Seems this is not kernel but vzquota bug.
cPanel techs says I"m not alone with it.

Yes, I saw it after my post
Thank you.

Still not fixed though.
