Subject: 32bit or 64bit for RHEL6 installation?

Hi,

what is the situation with different tools (vzpkg, vzyum etc.) and 64 bit kernel of RHEL6? I remember with RHEL5 some tools were not functioning properly and we had a fair share of issues in comparison to 32 bit version.

Now with RHEL6 kernel available has anything changed? Is 64 bit still causing headaches?

AFAIK, vzyum and vzpkg are obsolete.
